

Dem-Con Recovery and Recycling

December 2017 LEED Report

Dem-Con Recovery and Recycling is dedicated to the recovery of construction and demolition debris. Our facility utilizes a mechanized sorting system to recover six different materials: ferrous and non-ferrous metals, cardboard, wood, aggregate, and alternative daily cover (ADC). A combination of equipment and manual sorting results in high quality materials being sent to end markets throughout the Twin Cities and greater Minnesota.

Certified Recycling Facility

Dem-Con is proud to be certified by the Recycling Certification Institute. This third party certification ensures our customers that Dem-Con's recycling numbers are real, accurate, and reliable. An additional LEED credit is available to haulers that utilize our facility.

Ask how you can receive 1 extra LEED point when using our facility.

Material Recycled	December	Year to Date
Line Residuals	32.74%	29.41%
ADC	38.28%	24.57%
Cardboard	1.27%	1.24%
Wood	18.19%	17.45%
Aggregate	4.83%	6.54%
Steel	4.54%	5.40%
Other Metals	0.15%	0.25%
Shingles	0.00%	15.14%
Total Recovered	67.26%	70.59%

Recovered materials are delivered to the following facilities:

- New Ulm Steel
218 19th St.
New Ulm, MN 56073
- Koda Energy
800 1st Ave. W.
Shakopee, MN 55379
- LDI Fibers
13500 Liberty Lane
Becker, MN 55308
- Dem-Con Shingle Processing
13020 Dem-Con Drive
Shakopee, MN 55379
- Final Grade
3441 Bluff Drive
Jordan, MN 55352
- Dem-Con Metal Recycling
13142 Dem-Con Drive
Shakopee, MN 55379
