

Dem-Con Recovery and Recycling

January 2018 LEED Report

Dem-Con Recovery and Recycling is dedicated to the recovery of construction and demolition debris. Our facility utilizes a mechanized sorting system to recover six different materials: ferrous and non-ferrous metals, cardboard, wood, aggregate, and alternative daily cover (ADC). A combination of equipment and manual sorting results in high quality materials being sent to end markets throughout the Twin Cities and greater Minnesota.

Certified Recycling Facility

Dem-Con is proud to be certified by the Recycling Certification Institute. This third party certification ensures our customers that Dem-Con's recycling numbers are real, accurate, and reliable. An additional LEED credit is available to haulers that utilize our facility.

**Ask how you can receive 1 extra LEED point
when using our facility.**

Material Recycled	January	Year to Date
Line Residuals	32.49 %	32.49 %
ADC	32.28 %	32.28 %
Cardboard	1.48 %	1.48 %
Wood	21.51 %	21.51 %
Aggregate	5.75 %	5.75 %
Steel	6.04 %	6.04 %
Other Metals	0.45 %	0.45 %
Shingles	0.00 %	0.00 %
Total Recovered	67.51 %	67.51 %

Recovered materials are delivered to the following facilities:

- New Ulm Steel
218 19th St.
New Ulm, MN 56073
- Koda Energy
800 1st Ave. W.
Shakopee, MN 55379
- LDI Fibers
13500 Liberty Lane
Becker, MN 55308
- Dem-Con Shingle Processing
13020 Dem-Con Drive
Shakopee, MN 55379
- Final Grade
3441 Bluff Drive
Jordan, MN 55352
- Dem-Con Metal Recycling
13142 Dem-Con Drive
Shakopee, MN 55379
