

Dem-Con Recovery and Recycling

February 2018 LEED Report

Dem-Con Recovery and Recycling is dedicated to the recovery of construction and demolition debris. Our facility utilizes a mechanized sorting system to recover six different materials: ferrous and non-ferrous metals, cardboard, wood, aggregate, and alternative daily cover (ADC). A combination of equipment and manual sorting results in high quality materials being sent to end markets throughout the Twin Cities and greater Minnesota.

Certified Recycling Facility

Dem-Con is proud to be certified by the Recycling Certification Institute. This third party certification ensures our customers that Dem-Con's recycling numbers are real, accurate, and reliable. An additional LEED credit is available to haulers that utilize our facility.

Ask how you can receive 1 extra LEED point when using our facility.

Material Recycled	February	Year to Date
Line Residuals	33.29 %	32.84 %
ADC	34.40 %	33.19 %
Cardboard	1.67 %	1.57 %
Wood	20.16 %	20.93 %
Aggregate	4.03 %	5.00 %
Steel	6.09 %	6.06 %
Other Metals	0.36 %	0.41 %
Shingles	0.00 %	0.00 %
Total Recovered	66.71 %	67.16 %

Recovered materials are delivered to the following facilities:

- New Ulm Steel
218 19th St.
New Ulm, MN 56073
- Koda Energy
800 1st Ave. W.
Shakopee, MN 55379
- LDI Fibers
13500 Liberty Lane
Becker, MN 55308
- Dem-Con Shingle Processing
13020 Dem-Con Drive
Shakopee, MN 55379
- Final Grade
3441 Bluff Drive
Jordan, MN 55352
- Dem-Con Metal Recycling
13142 Dem-Con Drive
Shakopee, MN 55379
