

Dem-Con Recovery and Recycling

October LEED Report

Dem- Con Recovery and Recycling is dedicated to the recovery of construction and demolition debris. Our facility utilizes a mechanized sorting system to recover six different materials: ferrous and non-ferrous metals, cardboard, wood, aggregate, and alternative daily cover (ADC). A combination of equipment and manual sorting results in high quality materials being sent to end markets throughout the Twin Cities and greater Minnesota.

Certified Recycling Facility

Dem-Con is proud to be certified by the Recycling Certification Institute. This third-party certification ensures our customers that Dem-Con’s recycling numbers are real, accurate, and reliable. An additional LEED credit is available to haulers that utilize our facility.

Ask how you can receive 1 extra LEED point when using our facility.

Materials Managed	October	12-month average
ADC	29.34%	25.56%
Cardboard	0.05%	0.23%
Wood	18.39%	15.31%
Aggregate	1.86%	3.17%
Steel	2.99%	4.21%
Other Metals	0.25%	0.23%
Shingles	22.71%	24.45%
Total Recovered	75.59%	73.16%
Line Residuals	24.41%	26.84%

Recovered materials are delivered to the following facilities:

New Ulm Steel
218 19th St.
New Ulm, MN 56073

Koda Energy
800 1st Ave. W.
Shakopee, MN 55379

LDI Fibers
13500 Liberty Lane
Becker, MN 55308

Dem-Con Shingle Processing
13020 Dem-Con Drive
Shakopee, MN 55379

Final Grade
3441 Bluff Drive
Jordan, MN 55352

Dem-Con Metal Recycling
13142 Dem-Con Drive
Shakopee, MN 55379
